RESPONSE TO SECOND RESTRICTION REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the Second Restriction Requirement of November 3, 2008 in the subject U.S. patent application, applicants elect to prosecute the invention or group of inventions identified by the Examiner as Group II, claims 69-82, 84, 105, 115, 118 and 121, directed to a rotating body of a printing press including a barrel with a temperature control medium flow channel which is formed in a thermal insulating material. Applicants again expressly reserve the right to file one or more divisional patent applications directed to the inventions or groups of inventions not selected for prosecution in this application.

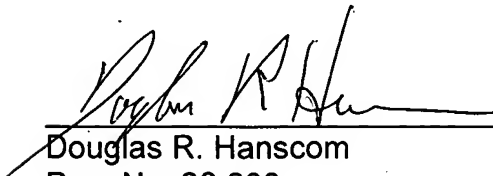

The Examiner's willingness to consider the applicants' position, as set forth in the Response filed July 16, 2008, is appreciated.

An early and favorable Office Action on the merits is respectfully requested.

Respectfully submitted,

Martin BECKER et al.
